Learning Objectives

By the end of this lesson, you'll be able to:

- Explain Python's purpose as a programming language.
- Define a few key differences between Python versions 2.7 and 3.6.
- List some reasons for and examples of Python in the data science field.
- Understand statistics as tool- and language-agnostic.
- Compare Python to other programming languages and tools.
- Define some of Python's specific benefits and advantages.
