What Is Data Science?

In general, data science is defined as the practice of extracting insights from data to guide decision-making. To achieve this, data scientists leverage a combination of computer skills, statistical understanding, and subject matter expertise.

Put plainly, it's the application of scientific techniques to data to solve problems.

Man, I am a lousy cook. Can you give me a few pointers?

Um... Thanks?

If flavor compound $y > 4.23$
(palate sensitivity rating)
and simmer time is ≤ 7.45
then decrease ratio of
ingredient y to z by .75
