## ← Pre-Course Work

2 / 3

### Course Flow

The prework contains lessons that will get you up to snuff on the basic terminology, concepts, and software that we'll be using once our course gets underway.

You'll do all the work here on the MyGA platform. Be sure to complete all assigned lessons before your first day in the classroom. The prework will take you approximately 15-20 hours to complete, so pace yourself accordingly.

Please complete all the pre-work before your first day so that you and your computer will be prepared for class!
