## Knowledge Check

Which of the following commands could you use to get the absolute file path to a directory?

*Select the best answer.*

○ `ls`

○ `mkdir`

○ `terminal`

○ `pwd`                                                                 ✔

> **Correct:** Assuming you are working in said directory — or even file, depending on its type — you can print the current working directory.
