Lesson Practice

Ready for some practice? Open up the terminal and perform the following tasks, making sure to spend some time practicing before you move on to the next slide:

1. Navigate to your home directory.
2. List all of the files in your home directory.
3. Make a new directory called `awesome_directory`.
4. Move into `awesome_directory` and create a new file called `awesome_file`.
5. Move `awesome_file` into your home directory.
6. Copy `awesome_file` into `awesome_directory`.
7. Delete `awesome_file` from your home directory.
8. Delete `awesome_directory` and everything inside of it using command flags.
